DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-28 and 41-69, drawn to Suspension system, classified in class 280, subclass 276.
 - II. Claims 29-40 and 70-82, drawn to valve mechanism, classified in class 137, subclass 469.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the suspension system does not require a valve stop. The subcombination has separate utility such as a pop valve mechanism in a pressure reactor.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3611

4. This application further contains claims directed to the following patentably distinct species of the claimed invention:

Species A, drawn to figures 1 - 6.

Species B, drawn to figures 8 and 10.

Species C, drawn to figure 7

Species D, drawn to figure 9

Species E, drawn to figure 13.

Species F, drawn to figure 19.

5. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims appear generic.

Applicant is advised that **a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added.** An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

6. This application further contains claims directed to the following patentably distinct **sub-**species of the claimed invention: Species A; Subspecies 1_A, drawn to figure 3a.

Subspecies 2_A, drawn to figure 4a.

Subspecies 3_A, drawn to figure 5a.

Subspecies 4_A, drawn to figure 6a.

Subspecies 5_A, drawn to figure 11b.

Art Unit: 3611

Species B; Subspecies 1_B, drawn to figure 8.

Subspecies 2_B, drawn to figure 10.

7. If applicant's elect either Species A or Species B, applicant is further required under 35 U.S.C. 121 to further elect a single disclosed sub-species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims appear generic.

Applicant is advised that **a reply to this requirement must include an identification of the sub-species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added.** An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

8. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. **If claims are added after the election, applicant must indicate which are readable upon the elected species.** MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 3611

9. A telephone call was made to Milan Milosevic on 3/15/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

10. Applicant is advised that the reply to this requirement to be complete must include an election of the invention, species and sub-species to be examined and the claims readable thereon, even though the requirement be traversed (37 CFR 1.143).

11. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel Yeagley whose telephone number is 703 - 305 - 0838. The examiner can normally be reached on Mon. - Fri; first Friday off.

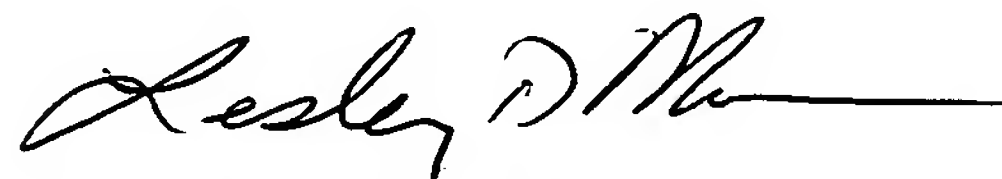

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lesley D Morris can be reached on 703 - 308 - 0629. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

In the near future; because of a pending move of the examining corps to a new campus, the examiner and SPE telephone numbers will change to 571 - 272 - 6655 and 571 - 272 - 6651; respectively.
